Journal of Optimization Theory and Applications is published monthly at Winterstoke Road, Bristol 3, England, by Plenum Publishing Corporation, 227 West 17th Street, New York, N.Y. 10011. In 1976, Volumes 18, 19, and 20 (4 issues each) will be published. *Journal of Optimization Theory and Applications* is abstracted or indexed in Applied Mechanics Reviews, Citation Index, Contents of Contemporary Mathematical Journals and New Publications, Current Contents, Engineering Index, INSPEC—Computer and Control Abstracts, Mathematical Reviews, Source Index, and Zentralblatt für Mathematik. © 1976 Plenum Publishing Corporation.

Differential Game Issue

This Issue Edited by G. Leitmann

FOREWORD 1

CONTRIBUTED PAPERS

Generalization of Domination Structures and Nondominated Solutions in Multicriteria Decision Making, *K. Bergstresser, A. Charnes, and P. L. Yu* 3

A Differential Game with Two Pursuers and One Evader, *P. Hagedorn and J. V. Breakwell* 15

A Note on Nonzero-Sum Differential Games with Bargaining Solution, *A. Haurie* 31

Maximal Vectors and Multi-Objective Optimization, *J. G. Lin* 41

On a Problem of Stochastic Differential Games, *P. T. Liu* 65

Equivalences Between Differential Games and Optimal Controls, *E. E. M. Rechtschaffen* 73

Differential Games Without Pure Strategy Saddle-Point Solutions, *W. E. Schmitendorf* 81

A Sufficiency Condition for Coalitive Pareto-Optimal Solutions, *W. E. Schmitendorf and G. Moriarty* 93

Zero-Sum Games with Incompletely Defined Payoff, *A. Sprzeuzkouski* 103

Sufficient Conditions for Preference Optimality, *W. Stadler* 119

On Saddle-Point Optimality in Differential Games, *H. L. Stalford and G. Leitmann* 141

Role of Information in the Stochastic Zero-Sum Differential Game, *F. K. Sun and Y. C. Ho* 153

TECHNICAL NOTES

Some Thoughts on Saddle-Point Conditions and Information Structures in Zero-Sum Differential Games, *T. Basar* 165

A New Approach to *N*-Person, Nonzero-Sum, Linear Differential Games, *M. Vidyasagar* 171

GENERAL INFORMATION

Editorial Policy 177
Preparation of Papers 179
Editors' Addresses 183

Vol. 18, No. 2 **February 1976**

CONTRIBUTED PAPERS

New Least-Square Algorithms, *W. C. Davidon* 187
Rates of Convergence for a Method of Centers Algorithm, *R. Mifflin* 199
Optimal Investment Policy: An Application of Stokes' Theorem, *S. P. Sethi* 229
Numerical Solution of Singular Control Problems Using Multiple Shooting Techniques, *H. Maurer* 235
Optimization of a Class of Pulse-Frequency-Modulated Systems, *R. J. Kuhler and H. H. Yeh* 259
Suboptimal Feedback Control of Linear Periodic Systems, *Y. Nishikawa, N. Sannomiya, and H. Itakura* 271

TECHNICAL NOTE

On the Uniform Convergence of Samples of Lebesgue Integrals, *G. F. Bryant* 285

BOOK NOTICES 291

RESEARCH REPORTS 295

GENERAL INFORMATION

Editorial Policy 299
Preparation of Papers 301
Editors' Addresses 305

Vol. 18, No. 3 **March 1976**

CONTRIBUTED PAPERS

Choice of Optimal Search Strategy, *Y. Rubinstein* 309
The Continuity of the Optimum in Parametric Programming and Applications to Stochastic Programming, *B. Bereanu* 319
An Elementary Sufficiency Proof of an Absolute Minimum for a Nonparametric Variational Problem, *W. T. Reid* 335

On a Singular Differential System Arising from a Min–Max Control Problem, *A. Negro* 351

Reduction of Delayed Optimal Control Problems to Nondelayed Problems, *T. Guinn* 371

Optimization of Bifunctional Catalysts in Tubular Reactors, *E. P. Hofer* 379

Dynamic Optimization in Animal Feeding Strategies, with Application to African Weaver Birds, *P. L. Katz* 395

TECHNICAL NOTES

On the Solution of the Unidimensional Local Minimization Problem, *E. Höpfinger* 425

The Bang–Bang–Bang Problem Revisited, *J. Lewin* 429

RESEARCH REPORTS 433

Editorial Policy 435

Preparation of Papers 437

Editors' Addresses 441

Vol. 18, No. 4 **April 1976**

CONTRIBUTED PAPERS

Complimentary Problems over Cones with Monotone and Pseudomonotone Maps, *S. Karamardian* 445

Supermemory Descent Methods for Unconstrained Minimization, *M. A. Wolfe and C. Viazminsky* 455

Solving the Nonlinear Least Square Problem: Application of a General Method, *J. T. Betts* 469

Back-and-Forth Shooting Method for Solving Two-Point Boundary-Value Problems, *P. J. Orava and P. A. J. Lautala* 485

Weak Fractured Solutions in the Calculus of Variations, *S. M. Rohde* . 499

Pontryagin Functions for Multiple Integral Control Problems, *H. Rund* 511

Optimal Steady-State Versus Periodic Operation in Discrete Systems, *S. Bittanti, G. Fronza, and G. Guardabassi* 521

Optimal Impulsive Control of Compartment Models, I: Qualitative Aspects, *J. G. Pierce and A. Schumitzky* 537

TECHNICAL NOTES

A Note on Functions Whose Local Minima Are Global, *I. Zang, E. U. Choo, and M. Avriel* 555

Pontryagin's Principle for Problems with Isoperimetric Constraints and for Problems with Inequality Terminal Constraints, *W. E. Schmitendorf* 561

FUNDAMENTAL TEXTS

Introduction to Vectors and Tensors

Ray M. Bowen and **C. -C. Wang,** Rice University

Breaking away from the traditional emphasis on problem-solving techniques, this two-volume text features a systematic development of concepts that equip the student to deal more easily with advanced courses. Extensive, lucid coverage of linear algebra, multilinear algebra, and vector and tensor analysis, makes this an excellent textbook as well as an ideal self-study guide for engineers, applied mathematicians, and physicists. A volume in Mathematical Concepts and Methods in Science and Engineering.

Volume 1: Linear and Multilinear Algebra approx. 240 pages
Volume 2: Vector and Tensor Analysis approx. 195 pages
$19.50 per volume

Mathematical Logic
An Introduction to Model Theory

A. H. Lightstone, Queen's University, Ontario

Mathematical Logic develops a form of the classical predicate calculus that provides a foundation for nonstandard analysis and axiomatic set theory. Perfect as a text for courses in mathematical or symbolic logic, and graduate and undergraduate mathematics, it is especially geared to the needs of students with little background in logic. A volume in Mathematical Concepts and Methods in Science and Engineering.

approx. 300 pages $22.50

Operational Calculus

Gregers Krabbe, Purdue University

Equally valuable for students of engineering and mathematics, *Operational Calculus* concentrates on examples that illustrate the practical usefulness of the theory for solving both traditional and "non-standard" problems. In using Jan Mikusiński's method of "direct approach," which succeeds in avoiding the unnecessary restriction of the Laplace transform method, the book gains in both notational and conceptual simplicity.

349 pages 1975 paperback: $8.95

Essentials of Statistics for Scientists and Technologists

C. Mack, Institute of Technology, Bradford

Illustrated by detailed examples from actual research in chemistry, physics, engineering, biology, and sociology, this book provides a complete introduction to the field of statistics. It outlines derivations and offers the reader a firm grasp of the actual uses of statistical formulas.

174 pages hardcover: $19.50
paperback: $4.95

Journal of Optimization Theory and Applications is published monthly at Winterstoke Road, Bristol 3, England, by Plenum Publishing Corporation, 227 West 17th Street, New York, N.Y. 10011. In 1976, Volumes 18, 19, and 20 (4 issues each) will be published. Subscription orders should be addressed to the publisher. *Journal of Optimization Theory and Applications* is abstracted or indexed in Applied Mechanics Reviews, Citation Index, Contents of Contemporary Mathematical Journals and New Publications, Current Contents, Engineering Index, INSPEC—Computer and Control Abstracts, Mathematical Reviews, Source Index, and Zentralblatt für Mathematik. © 1976 Plenum Publishing Corporation.

JOURNAL OF OPTIMIZATION
THEORY AND APPLICATIONS

Vol. 19, No. 1 May 1976

Existence Theorem Issue

This Issue Edited by L. Cesari

CONTENTS

FOREWORD 1

CONTRIBUTED PAPERS

Weak Lower Semicontinuity of Integral Functionals, *C. Olech* 3

The Duality of Convex Functions and Cesari's Property (Q), *G. S. Goodman* 17

On the Optimal Control of Systems Governed by Nonlinear Volterra Equations, *T. S. Angell* 29

Existence Theorems for Optimization Problems Concerning Linear, Hyperbolic Partial Differential Equations without Convexity Conditions, *M. B. Suryanarayana* 47

Existence of Optimal Control without Convexity and a Bang–Bang Theorem for Linear Volterra Equations, *T. S. Angell* 63

An Existence Theorem in the Calculus of Variations, *J. E. Rubio* . . . 81

Existence Theorems for Lagrange Control Problems with Unbounded Time Domain, *R. F. Baum* 89

Comments on a Selector Theorem in Banach Spaces, *N. U. Ahmed and K. L. Teo* 117

Hypotheses Implying Cesari's Property (Q), *R. D. Rupp* 119

Remarks on Lower Semicontinuity and Lower Closure, *M. B. Suryanarayana* 125

Orientor Field Equations in Banach Spaces, *P. J. Kaiser and M. B. Suryanarayana* 141

Nemitsky's Operators and Lower Closure Theorems, *L. Cesari and M. B. Suryanarayana* 165

Geometric and Analytic Views in Existence Theorems for Optimal Control. III. Weak Solutions, *L. Cesari* 185

GENERAL INFORMATION

Editorial Policy 215

Preparation of Papers 217

Editorial Addresses 221

JOURNAL OF OPTIMIZATION
THEORY AND APPLICATIONS

Vol. 19, No. 2 June 1976

CONTENTS

CONTRIBUTED PAPERS

An Existence Theorem for the Complementarity Problem, *S. Karamardian* 227

A Computational Study of Methods for Solving Polynomial Geometric Programs, *J. J. Dinkel, G. A. Kochenberger, and B. McCarl* 233

Infinitely Constrained Optimization Problems, *J. W. Blankenship and J. E. Falk* 261

Improved Convexity Cuts for Lattice Point Problems, *F. Glover and D. Klingman* 283

Statistical Linear Differential Games: A Treatment of Incomplete Information, *C. Duchateau* 293

Formal Asymptotic Solution of a Singularly Perturbed Nonlinear Optimal Control Problem, *M. I. Freedman and B. Granoff* 301

Analytic Determination of an Optimal Human Motion, *T. K. Ghosh and W. H. Boykin, Jr.* 327

TECHNICAL NOTE

Minimization of Ratios, *S. Schaible* 347

BOOK NOTICES 353

RESEARCH REPORTS 355

CONTENTS

CONTRIBUTED PAPERS

Numerical Solution of Unstable Two-Point Boundary-Value Problems by Quasilinearization and Orthonormalization, *M. Macconi and A. Pasquali* 367

Variable Metric Methods in Hilbert Space with Applications to Control Problems, *P. R. Turner and E. Huntley* 381

A Steepest-Descent Method for Optimization of Mechanical Systems, *E. J. Haug, J. S. Arora, and K. Matsui* 401

Boundary Arcs for Integral Equations, *V. L. Bakke* 425

On the Maximum Principle for a Class of Discrete Dynamical Systems with Lags, *C. A. Burdet and S. P. Sethi* 445

Optimal Controls with Equality State Constraints, *A. B. Schwarzkopf* . 455

Optimal Solutions to Differential Inclusions, *F. H. Clarke* 469

On the Existence of Solutions to Compact Dynamic Optimization Problems, *M. R. Sertel* 479

Approximations for Optimal Laplace Transform Inversion, *I. M. Longman* 487

JOURNAL OF OPTIMIZATION
THEORY AND APPLICATIONS

Vol. 19, No. 4 August 1976

CONTENTS

CONTRIBUTED PAPERS

A Generalization of Lagrange's Method of Undetermined Multipliers Using Zero-Zone Functionals, *J. A. Gibson and W. S. Hoy* 509

Optimum Design in the Presence of Parametric Uncertainty, *B. M. Kwak and E. J. Haug, Jr.* 527

A Method for Constructing the Polar Cone of a Polyhedral Cone, with Applications to Linear Multicriteria Decision Problems, *K. Tamura* 547

Sharp Dual Estimates for Conductance of an Optimal Circular Cooling Fin, *S. Bhargava* 565

Linear Control Systems: Controllability with Constrained Controls, *L. Pandolfi* 577

Conjugate Gradient Versus Contraction Mapping, *J. C. Allwright* 587

Extremum Principles for Optimal Control in Normed Linear Spaces, *A. N. Andry and J. A. Walker* 613

Power-Series Approximations for the Optimal Feedback Control of Noisy Nonlinear Systems, *Y. Nishikawa, N. Sannomiya, and H. Itakura* 633

Numerical Treatment of a Parabolic Boundary-Value Control Problem, *K. Glashoff and S. Å. Gustafson* 645

JOURNAL OF OPTIMIZATION
THEORY AND APPLICATIONS

Vol. 20, No. 1 September 1976

CONTENTS

CONTRIBUTED PAPERS

Quadratic Multiplier Method Convergence, *R. D. Rupp* 1

Parametric Optimal Design, *B. M. Kwak and E. J. Haug, Jr.* 13

On Warner's Algorithm for the Solution of Boundary-Value Problems for Ordinary Differential Equations, *M. R. Mataušek* 37

Optimizing Inputs for Diagnosis of Diabetes. I. Fitting a Minimal Model to Data, *R. N. Bergman, R. E. Kalaba, and K. Spingarn* 47

On Isoperimetric Problems for Domains with Partly Known Boundaries, *E. L. Gurvitch* 65

On the Existence and Nonexistence of Lagrange Multipliers in Banach Spaces, *S. Kurcyusz* 81

Minimax Approach to Structural Optimization Problems, *N. V. Banichuk* 111

TECHNICAL NOTE

Conjugate Gradient Versus Steepest Descent, *J. C. Allwright* 129

GENERAL INFORMATION

Preparation of Papers 137

Editorial Addresses 141

JOURNAL OF OPTIMIZATION
THEORY AND APPLICATIONS

Vol. 20, No. 2 October 1976

CONTENTS

CONTRIBUTED PAPERS

Solution of Complex Matrix Equations with Changing Phase, *Z. J. Csendes* 145

On Quasi-Newton and Pseudo-Newton Algorithms, *S. S. Oren* 155

Analysis of Unbonded Contact Problems by Means of Quadratic Programming, *R. Chand, E. J. Haug, and K. Rim* 171

Stabilization of Neutral Functional Differential Equations, *L. Pandolfi* . 191

On the Existence of Optimal Controls for Nonlinear Systems, *A. Boyarsky* 205

Proper Equality Constraints and the Maximization of Index Vectors, *J. G. Lin* 215

TECHNICAL NOTES

Optimal Regulation of the Service Rate for a Queue with Finite Waiting Space, *C. H. Scott and T. R. Jefferson* 245

A Differential Game Without a Qualitative Saddle Point, *P. E. Kloeden* 251

BOOK NOTICES 255
